5) Next improvements (once you confirm preferences)

- Merge USD/CAD into a single CAD view using FX (you choose spot FX or Bank of Canada).
- Add concentration metrics: top-1/top-5/top-10 weight, and equity-vs-ETF split.
- Flag exposures you might not want (e.g., crypto ETFs inside RRSP/TFSA) if you prefer stocks-only.
- Auto-generate the daily brief watchlist from your largest positions + biggest movers.
